HUGE SEIZURE OF OPIUM.

The sist ' Loongsang," on her last trip to Manila, was held up and searched by the secret service on arrival. The search was fruitless but on the day she was to have sailed a small quantity of opium was discovered, which, leading to further search, discovered the astounding quantity of 2,500 tins or 1,000 kilos, valued in Manila at about 200,000 pesos. The steamer was released on a bond being given, but if the total fine is imposed, it will amount probably to more than the value of the steamer.

The installation of a new fog signalling apparatus has, we understand been completed at Waglan, and is to come into operation on the 15th inst. The character of the signal remains unchanged, viz., 2 reports every 12 minutes with an interval of 15 seconds between them. Instead of being fired from the old muzzle | TAILORS, DRAPERS & OUTFITTERS loading guns which have for so long answered the purpose, a gun cotton charge is now electrically fired from an fron jib which swings above the Light Tower. Whether the actual sound will be greater is doubtful, but more accurate timing between the sound is certain to result—which is a big factor with masters of vessels who are trying to " make the port

SECRET OF THE SPHINK.

CITY OF GOLD NEARLY 8,000 YEARS OLD.

Professor G. A. Reisner, Egyptologist at Harvard University, has communicated to the authorities of the Harvard Semitic Museum and the Boston Museum of Pine Arts the results of notable discoveries in connection with the Sphinx, says the Cairo correspondent of the "New York Herald."

Inside the Sphinx Professor Reisner found a temple dedicated to the Sun." is older than any of the Pyramids, as i dates from about 6,000 B.C., and is be lieved to be the most succept monument in Egyptian history.

Mens, or Menes, was the first King of Egypt of whom there is a historic record. and the tomb of this king, who was said to have made himself a god and fashioned the Sphinz, is within the Sphinz There are many tunnels leading into exvers which have not been penetrated, for the work has been going on only six months.

The Sphinx is carved out of the natural rock, but within are the caves and build ings of a city of gold, which was, perhaps even open to the air.

At present the excavations are confined to the chamber in the head. This chamber is sixty feet long by fourteen feet wide. It is connected by tunnels with the temple Foreign Goods of every description. of the Sun, which rests within the paws of

Such relics as the "Crox Ansata" (the Looped Cross), symbol of the Sun, are found by hundreds. Several of these are of gold, and have wires for tiny bells, which, when sounded by the priests, were said to have summoned up ghosts. Inside the Sphing are also tiny pyramids, al-though the Sphing was built long before the Great Pyramids.

A pyramid in those days was a sundial, according to Professor Reisner, and the Sphinx 1 as a sun god. The Pyramid of Cheops is a very accurate time keeper. Professor Reisoner hopes to discover among the relies of the Sphinz the secrets of the Exptien priests, whose magic is believed it have been marvellous.

THE DIET FOR RHEUMA-TIC PROPLE

DURING the warm, "muggy," rainy season, people with rheumatic tendencies are peculiarly liable to suffer from that disease, as well from lumbago,

disordered in rheumatic conditions, Among such foods, the medical profes-sion accords Sanatogen a pre-eminent

position. A physician, writing in The Medical Times, shows how it often works wonders in such cases. He mentions a patient who "suffered with chronic rheumatoid arthritis, affecting the fingers, wrist and knees, for two years. Under Sanatogen the incomnia, lack of appetite and nervous depression which she had complained of, quickly disappeared, and subsequently the swelling and pain in the joints became less marked."

Equally convincing is the case of another lady who "had had neurasthenia for years, and latterly had been confined to bed with sciatica. The pain was so severe at times. Malun Opinm:—Rule firm, and sales She was given Sanatogen, when the sciatica are reported in Old Opium about 2554 very soon completely disappeared, and her chests at \$3,000 to \$3,150 per picul. general health became very much im-

Sanatogen can be obtained of all Chemists Although it is not suggested that it will directly benefit all cases of rheumatism, sciatica, lumbago, etc., yet, as the above extracts prove, there are many cases in which it produces excellent results, while indirectly it benefits all sufferers by improving the general health.

Chartered Bank of India, Australia and

Increased Operations: Record Profits.

The 59th Ordinary General Meeting of the shareholders of the Chartered Bank of India, Australia, and China was held on the 10th ult., on the bank's premises, 38, Bishopsgate, under the presidency of Sir Montagu Cornish Turner, the chairman of the company.

The Manager (Mr. T. H. Whitehead) having read the notice convening the meeting.

"The Chairman said :- Gentlemen, may I take it that the report will be received as read? (Hear, hear.) In that case before moving the adoption of the report will make a few brief remarks in regard to the conditions of trade affecting our operations in the East and the Far East during the past 12 months. The most noticeable features have been the general activity of trade which prevailed in al quartors, we may say, not only of the East, but of the world, coupled with abnormally high prices for many of the commodities. I would instance jute and cotton, bides and skins from India, rice from Burma, tin from the Straits, hemp from the Philippines, and general produce from China-in all cases necessitating a good though rather an unusually high ilemand for financial accommodation, and resulting in the "useful and profitable employment of the resources of all banks trading in the East. It is satisfactory, gentlemen, for your directors and managers to be able to show, from the figures in the report which is now before you. that this bank has participated in the activity of trade to which I have referred. and that its resources have been very RYOJUN (PORT ARTHUR) | fully availed of during the past year. The report, indeed, will show that not only have the operations of the bank increased in extent, but that the profits shown for the past year are a record since the establishment of the bank in 1853. I am sure that that will be a matter of great satisfaction to the shareholders as well as to ourselves. (Hear, hear.) And this result, gentlemen, has been arrived at after making very liberal and ample provision for all bad and doubtful debts, and after we have written down in all cases the securities of the bank to the current mar ket rates on December 31, and in some

> cases below these rates; THE OPEN QUESTION. I would also like to mention that the commitments of this bank in the matter

of advances against opium are of a very moderate description indeed. (Hear, hear.) They are all amply secured, and we have not the slightest anxiety about any one of those commitments. At the same time; gontlemen, I do think we may well express our sympathy with our old and valued friends and constituents who have for many years been engaged in this perfectly legitimate and well-recognized ousiness—the shipment of opium from India to China. It has been recognized and approved, I suppose, by the Government of India, who have for years past obtained a very handsome revenue from that trade, and I do think the shippers deserve our sympathy when they are con- Fans. fronted with losses owing to the sudden and unexpected and entirely unprovoked action on the part of China in prohibiting the despatch of opium from the distribut-Every description of Banking and Ex. ing centres to the districts up country.

In China itself trade has naturally been disturbed by the unsuttled conditions of the country. 'At the same time there has been quito a fair import and export busihese carried on, and it would undoubtedly have been much greater had the conditions been normal; but I am glad to say that in many parts of China there were beentiful harvests, there was an absence of floods, and the people are contented and happy if let alone and not taxed too heavily. We may well expect, once the Government of China is in a more settled condition; that we shall have a great det elopment and improvement of business there. I look for that with all cortainty as soon as the conditions are favourable in China, and we must all of us forvently hope that the long-expected, greatlydelayed, and much talked of loan the loan to be issued under the ægis of the Six-Power group may shortly be brought out on the market. The delay has been execedingly prejudicial to the interests of China; it has interfered with the develop-OURRENT ACCOUNTS opened on the ment of trade, and it has greatly projudiced the" conditions of the present

Strength.

As a recuperative in all cases of lung, stomach or bowel weakness, or after any severe illness, Angier's Emulsion positively has no equal. Bland-and pleasant, is promotes appetite, aids digestion, and builds up health and strength. It is the ideal tonic and builder, because it is soothing and healing as well as strengthening. Angier's Emulsion is pleasant to take and agrees perfectly with delicate stomachs. It is equally good for all ages and may be given with perfect confidence to delicate, infants children. It is largely used in hospitals for children.

"Its Wonderful Building-up and Curative Properties."

Ashleigh, Knighton, Lewester,
Dear Sire,—It is with great pleasure I bear
testimony to the inestimable, value of Angier's
Emulsion. Nine years ago I had a bed attack
of neuritis, and after trying several remedies,
a physician of high standing prescribed Angier's
Emulsion. I examenced to take it tegularly,
and within a month began to feel the good
effects of it. I persevered and within three
months I was quite restored to health, I have
had bronchial and lung treubles, and without Angier's Emulsion I have no hesitation in saying that I should have been unable to carry eut the strenuous work I have undertaken. I have recommended Angier's Emulsion be hundreds of my friends in this country and abroad, who have all testified to its wonderful building-up and curative properties.

Now, gentlemen, I have merely to refer to the report that we make to you, and as regards our recommendations I can assure you it is with very great pleasure that the directors have been able to recommend the payment of a bonus. In discovery regarding the Englishman's pasall times we endeavour to preserve a policy of caution, always thinking of what is for the best in the interests of the shareholders and the bank, and it is very gratifying to us that we are able to make a little departure this year. As regards the amounts that we have set apart to various funds, I think I need only refer to one which is brought to my notice, and that is the allocation of £20,000 for the officers' pension fund, whereas in most years we have set apart £10,000. In two years we failed to make any allocationunfortunately we were unable to do soand this year we have recommended the allocation of £20,000, because you can well understand the sa the business of the bank expands the steff must grow, and as the bank grows in years the staff get older, and we consequently have to deal with a greater number of pensions for the managers and officers who have worked so well and faithfully for the bank. I do not for a moment imagine that you will grudge this particular allocation. but I think it right to explain to you why we are setting apart the sum of £20,000 instead of £10,000. It is quite right that we should do so when we can afford to. (Hear, hear.) With these remarks, gentlemen, I have to move ! R. E. PANCY DRESS BALL

A very successful hancy dress ball was given by the Royal Engineers last night at their theatre at Wellington Barracks. There was a very large number present, In the Summary Court this morning and the dresses worn were both pretty and activity, the ratio was 28 per Madame Flint, costumier, brought a original. There were some twenty four dances, and these were carried out to the delightful music of a good orchestra. So in years of depression our percentage balance of an account for two dresses and novel were the costumes that the officers forming the judging committee had some difficulty in awarding the prizes. The winners were-Ladies-Mrs. Dobinson, first; Mrs. Smitheman, second; Mrs. Evana, taird. Gentlemen-Sergt. Major Dobinson, first; Sergt. Smith, D.C.L I., second ; Qr. Mr. Sergt. Axford, third. The prizes were handed to the winners by Mrs. Craster. A very enjoyable time was spent by all, and the committee is to be congratulated on the success-of the ball.

Sir,-At the general meeting of the Society held on Tuesday it was decided Tracey (owe 4/8) beat Major Davy and to consider the advisability of adopting as to publish the following notes and

The object of the rules is to codify judging so that there shall be some de-

finite standard of excellence. " As far as possible, uniformity, or as least consistency, of principle has been sought to be attained, so that the rulesmay be harmonious. The principle of pointing adopted aims at bringing the values of the several recognised attributes of excellence into strict relation one to another: thereby presenting a definite system of judging, instead of one necessarily varying, as at present, with the varying preferences of individual judges." THE TURCO-BALKANS WAR. RUSSIA AND MONTENEGRO.

LONDON, April 11. A communique has been published et St. Petersburg to the offect that King Nicholas broke his undertaking to warn Russia in the event of war and to obtain her consent thereto. Nevertheless the Tear magnanimously aided the Montenegrins. When the question of Skutari was settled, a friendly notification was sent to King Nicholaswho was simultaneously warned of the grave responsibility of continuing the resistance and pursuing personal aims, which would condemn Montenegro to a useless massacre. These representations to King Nicholas were without effect, and it was clear that he based his calculations on the embroilment of Russia and the Powers in a European war. It was impossible for Russin. berefore, to oppose the measures enecessitated by the refusal of King Nicholas to submit to the decree of the Powers. Russia cannot abandon her mope that Montenegro will cease from her obstinacy and will submit to the will of Europe, supported by an impenzing Naval display. Europe will then find means of alleviating the lot of the Montenegrins, overwhelmed by the

.accifices entailed in besieging Skutari. The communique reminds the Balkanites that Russia, which gave them dife, continues to be necessary to them for the purpose of mutual reconcilia stion, without which they cannot acquire wigour. The relations of Russia and who Slav peoples exclude the idea of phostility to other nations. It cannot be admitted that the cause of peace will gain by the clash of races.

BUSSIA AND THE BALKAN STATES.

A telegram from St. Petersburg states that the communique from the Eoreign Ministry says that the principal sobject of Russia is to secure to the Balkanites the fruits of victories attained. As the result of complicated and difficult 'negotiations, Russia had preserved Prizzend, Ipek, Djikova, and Dibra for the Slave, but they thought it necessary to concede Skutari to Albania in order to preserve peace, a supture of which in such a cause would be manifestly abourd. As Skutari was a purely Albanian town, and the sent of the Roman Catholic Archbishop moreover, the Russian · Vice-Consul at Skutari had proved that the Montenegrins were essentially a military race, incapable of assimilating the several thousand Albanians settled in Montenegro thirty-five years .ago, and consequently the annexation of a portion of Sandjak and Skutari, bringing in a hundred thouand Albanians, would tend to make Montenegro merely Montenegrin Albania:

DIPLOMATISTS HOPEFUL

Reuter says that the feeling of the Aliplomatists regarding the solution of the difficulty with Montenegro and for an early conclusion of peace is increaslingly hopeful. Italy and Russia are acting at Cetinje with a view to offering compensation for the loss Skutari, while powerful unofficial influences are working in London to .effect a better understanding between the Powers and Montenegro.

Semi-official statements in Berlin and Vienna confirm the above and emphasise that territorial compensation cannot be granted at the expense of Albania. It must be at the expense of | Servia in the plain of Skutari.

WHOLESALE EXECUTIONS CONDENNED.

At a recent sitting of the Canton Chamber, or Assembly, according to the report, there was a stirring debate in respect of the many executions, which have recently been carried out by the Government Whather these executions are necessary of not, an outsider cannot say. But the re presentatives affirm, that they are more than they should be, and that at times they are not carried out with the care that ought to characterize such painful tasks. There, seems to lurk behind it all the feeling that the time has come when not military but civil rule should obtain: It is assumed that military rule is still in the ascendency, because, all those who have been deemed worthy of death, are shot, and this in itself is regarded as evidence. that military law prevails. A debate of this kind must do good. It has long been a difficulty with the Chinese to know what to do with the worst of their criminals. The whole matter is very complex; but really the thing to be done is to go back one step farther, and see to it that there is more work for the people, and more real education which will without doubt p event so many from taking to robbery as a means of livelihood. Of course, at present, when everything is still unsettled. If we have read the debate aright, this is supposed to be a retrograde movement; there ought to be a central authority at Capton, which is responsible f r the entire province, and which can be pounded upon if things do not soon mend in this regard. It is well known that in the first rush of the people after Republicanism, many of the better classes, rather of the moneyed classes, of Chinese imitated foreign ways. and especially foreign clothes. It followed that many shops were opened in 'the more fashionable parts of the city to cater for those who followed the new fashions. But it seems the rage, has not continued. any rate, if it has then it is evident that too many shops entered the market, for many of them are closing down. I seems that there is on the part of many a distinct hardening of the face against foreign fashions. For example, the old round cap was flung away with the queue, But recently in the West End it is reported that many of the better classes are reverting thereto, and are discarding felt hats and cloth caps. One resson for this was given to me. " Our own round hate are more couvenient, we wear foreign hats, when we enter building we must remove them ; it is impolita to keep them on the head.
